Subject: Fwd: REQUEST From DNREC to attend a Blades DE Public Meeting March 1st

Just FYI.

Ex. 6 Personal Privacy

Nothing for you to do on this now

Call ya later.

Thanks,
Steve

Steven Hirsh, Associate Director
Federal Facilities Remediation and Site Assessment

Karen, Linda, Steve, and Stacie,

I circled back to Mike Towle -- he's been working closely with Eduardo. Here's our thoughts:

Nonresponsive based on revised scope

Here's where we are:

1. <!--[if !supportLists]--><!--[endif]-->Collected water samples from the public drinking water supply in the Town of Blades. The results verify existing information. The results are:
 - <!--[if !supportLists]--><!--[endif]-->Public Well Ex 3 Wells PFOS 140 ng/l and PFOA 20 ng/l

- <!--[if !supportLists]--><!--[endif]-->Public Well [Ex. 8 Wells]: PFOS 53 ng/l and PFOA 26 ng/l
- <!--[if !supportLists]--><!--[endif]-->Public Well [Ex. 9 Wells]: PFOS 210 ng/l and PFOA 19 ng/l
- <!--[if !supportLists]--><!--[endif]-->[Ex. 9 Wells] (where the wells converge before distribution): PFOS 220 ng/l and PFOA: 18 ng/l

The State arranged for the placement of carbon units on the public supply. Carbon on Blades water supply seems effective. We collected a sample a few hours after the carbon filtration was up and running. The results for the treated municipal well was PFOA 3.4 ng/l.

2. <!--[if !supportLists]--><!--[endif]-->Collected numerous samples of drinking water from residential wells and shipped those samples for analysis. The initial analytical results are due shortly -- likely to arrive over the weekend. Next steps depend on those results. If private drinking water sources have concentrations above an RML level of 400 ng/L, the State will likely ask EPA for assistance where we can. Any further EPA assistance will require additional consultation with HQ.

Nonresponsive based on revised scope

Finally, Mike and I are [Ex. 6 Personal Privacy (PP)] on travel all next week.

Bonnie
